## 1. Basis of preparation and significant accounting policies

### (a) Basis of preparation

The unaudited interim financial information has been prepared in accordance with HKAS 34 "Interim Financial Reporting" issued by the HKICPA.

### (b) Significant accounting policies

Except for the initial adoption of the below mentioned amendments, the significant accounting policies adopted and methods of computation used in the preparation of the unaudited interim financial information are consistent with those adopted and used in the Group's annual financial statements for the year ended 31 December 2021 and shall be read in conjunction with the Group's Annual Report for 2021.

# Amendments that are relevant to the Group and are initially adopted for the financial year beginning on 1 January 2022

The Group has initially applied the following amendments for the financial year beginning on 1 January 2022:

- Accounting Guideline 5 (Revised), "Revised Accounting Guideline 5 Merger Accounting for Common Control Combinations" ("AG 5"). The amendments revise to reflect a clearer rationale for why the transaction described in paragraph 5 of AG 5 is not a business combination and why, in practice, those transactions are accounted for by applying a principle similar to that for a reverse acquisition. New disclosure requirements for common control combinations are added to paragraph 19 of AG 5. The accounting for change in non-controlling interests as a result of common control combination is clarified in the example in AG 5. The terminologies and references in AG 5 are updated to align with existing Hong Kong Financial Reporting Standards ("HKFRSs"). The application of the amendments does not have a material impact on the Group's financial statements.
- HKAS 16 (Amendments), "Property, Plant and Equipment: Proceeds before Intended Use". The amendments prohibit an entity from deducting from the cost of an item of property, plant and equipment any proceeds received from selling items produced while the entity is preparing the asset for its intended use. It also clarifies that an entity is 'testing whether the asset is functioning properly' when it assesses the technical and physical performance of the asset. The financial performance of the asset is not relevant to this assessment. Entities must disclose separately the amounts of proceeds and costs relating to items produced that are not an output of the entity's ordinary activities. The related sales proceeds together with the costs of providing these items as determined by HKAS 2, should be included in profit or loss. The amendments are applied retrospectively, but only to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented in the financial statements in which the entity first applies the amendments. The application of the amendments does not have a material impact on the Group's financial statements.
- HKAS 37 (Amendments), "Onerous Contracts Cost of Fulfilling a Contract". The amendments clarify that for the purpose of assessing whether a contract is onerous, the cost of fulfilling the contract includes both the incremental costs of fulfilling that contract and an allocation of other costs that relate directly to fulfilling contracts. Before recognising a separate provision for an onerous contract, the entity recognises any impairment loss that has occurred on assets used in fulfilling the contract. The amendments are applied to contracts for which exist at the date when the amendments are first applied, with the cumulative effect of applying the amendments to be recognised as an opening balance adjustment to retained earnings or other component of equity, as appropriate. The comparatives are not restated. The application of the amendments does not have a material impact on the Group's financial statements.

## 1. Basis of preparation and significant accounting policies (continued)

### (b) Significant accounting policies (continued)

Amendments that are relevant to the Group and are initially adopted for the financial year beginning on 1 January 2022 (continued)

• HKFRS 3 (Amendments), "Reference to the Conceptual Framework". The amendments update a reference in HKFRS 3 to the Conceptual Framework for Financial Reporting issued in 2018. The amendments also add to HKFRS 3 an exception to its requirement for an entity to refer to the Conceptual Framework to determine what constitutes an asset or a liability. The exception specifies that, for some types of liabilities and contingent liabilities, an entity applying HKFRS 3 should instead refer to HKAS 37. The exception has been added to avoid an unintended consequence of updating the reference to the Conceptual Framework. The amendments also confirm that contingent assets should not be recognised at the acquisition date. The amendments are applied prospectively. Earlier application is permitted if at the same time or earlier an entity also applies all the amendments made by Amendments to References to the Conceptual Framework in HKFRS Standards, issued in June 2018. The application of the amendments does not have a material impact on the Group's financial statements.

# (c) Standard and amendments issued that are relevant to the Group but not yet mandatorily effective and have not been early adopted by the Group in 2022

| Standard/Amendments                                | Content   | Applicable for financial years beginning on/after |
|--|---|---|
| HKAS 1 and HKFRS Practice Statement 2 (Amendments) | Disclosure of Accounting Policies   | 1 January 2023                                    |
| HKAS 8 (Amendments)                                | Definition of Accounting Estimates  | 1 January 2023                                    |
| HKAS 12 (Amendments)                               | Deferred Tax related to Assets and Liabilities arising from a Single Transaction      | 1 January 2023                                    |
| HKAS 28 (2011) and<br>HKFRS 10 (Amendments)        | Sale or Contribution of Assets between an Investor and its Associate or Joint Venture | To be determined                                  |
| HKFRS 17   | Insurance Contracts   | 1 January 2023                                    |

- HKFRS 17, "Insurance Contracts". HKFRS 17 sets the requirements that an entity should apply in accounting for insurance contracts and reinsurance contracts. Please refer to Note 2.1(b) of the Group's Annual Report for 2021 for brief explanations of the standard. The Group is in the process of implementing and assessing the impact of the adoption of HKFRS 17. The Group will quantify the financial impact of the adoption of the standard once it is practicable to make reliable estimates.
- Please refer to Note 2.1(b) of the Group's Annual Report for 2021 for brief explanations of the remaining amendments.

### (d) Improvements to HKFRSs

"Improvements to HKFRSs" contains numerous amendments to HKFRSs which the HKICPA considers not urgent but necessary. It comprises amendments that result in accounting changes for presentation, recognition or measurement purposes as well as terminology or editorial amendments related to a variety of individual HKFRSs. These improvements will not have a material impact on the Group's financial statements.

# 2. Critical accounting estimates and judgements in applying accounting policies

The nature and assumptions related to the Group's accounting estimates in this reporting period are consistent with those used in the Group's financial statements for the year ended 31 December 2021.

### 3. Financial risk management

The Group is exposed to financial risks as a result of engaging in a variety of business activities. The principal financial risks are credit risk, market risk (including currency risk and interest rate risk) and liquidity risk. This note summarises the Group's exposures to these risks.

A summary of the Group's objectives, risk management governance structure, policies and processes for managing and the methods used to measure these risks is set out in Note 4 to the Financial Statements of the Group's Annual Report for 2021.

#### 3.1 Credit risk

Financial instruments are considered to be in default when one or more events that have a detrimental impact on the estimated future cash flows occurred such as past due for more than 90 days or the borrower is unlikely to pay in full for the credit obligations to the Group.

Credit-impaired financial instruments are classified as Stage 3 and lifetime expected credit losses will be recognised. Evidence that a financial instrument is credit-impaired include observable data about the following events:

- Significant financial difficulty incurred by the borrower;
- A breach of contract, such as a default or delinquency in principal or interest payment;
- For economic or contractual reasons related to the borrower's financial difficulty, the Group has granted to the borrower a concession that it would not otherwise consider;
- Probable that the borrower will become bankrupt or undergo other financial reorganisation;
- The purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses; or
- Other observable data indicating that there is a measurable decrease in the estimated future cash flows from such financial instruments.

#### (A) Advances and other accounts

Advances with a specific repayment date are classified as overdue when the principal or interest is past due and remains unpaid. Advances repayable by regular instalments are classified as overdue when an instalment payment is past due and remains unpaid. Advances repayable on demand are classified as overdue either when a demand for repayment has been served on the borrower but repayment has not been made in accordance with the instruction or when the advances have remained continuously to exceed the approved limit that was advised to the borrower.

Advances classified as Stage 3 may not necessarily result in impairment loss where the advances are fully collateralised.

## 3. Financial risk management (continued)

## 3.1 Credit risk (continued)

### (A) Advances and other accounts (continued)

Gross advances and other accounts before impairment allowances are analysed by internal credit grade and stage classification as follows:

|  |                   | At 30 June        | 2022              |                 |

| Impairment allowances made in respect of such advances | 3,857              | 3,857                               | 2,632               | 2,632                               |

Classified or impaired advances to customers represent advances which are either classified as "substandard", "doubtful" or "loss" under the Group's classification of loan quality, or classified as Stage 3.

The impairment allowances were made after taking into account the value of collateral in respect of the credit-impaired advances.

|   | At 30 June<br>2022<br>HK\$'m | At 31 December<br>2021<br>HK\$'m |
|---|------------------------------|----------------------------------|
| Current market value of collateral held against the covered portion of impaired advances to customers | 4,324                        | 2,260                            |
| Covered portion of impaired advances to customers   | 2,181                        | 1,062                            |
| Uncovered portion of impaired advances to customers   | 5,629                        | 3,259                            |

As at 30 June 2022, there were no impaired trade bills and advances to banks and other financial institutions (31 December 2021: Nil).

    - (c) Rescheduled advances

|  | At 30 June 2022 |                                  | At 31 Decer | mber 2021                              |
|--|-----------------|----------------------------------|-------------|--|
|  | Amount          | % of gross advances to customers | Amount      | % of gross<br>advances to<br>customers |
|  | HK\$'m          |                                  | HK\$'m      |  |
| Rescheduled advances to customers net of amounts included in "Advances overdue for more than |                 |                                  |             |  |
| three months"  | 157             | 0.01%                            | 216         | 0.01%                                  |

Rescheduled advances are those advances that have been restructured and renegotiated between the bank and borrowers because of deterioration in the financial position of the borrower or the inability of the borrower to meet the original repayment schedule, and the revised repayment terms, either of interest or the repayment period, are "non-commercial" to the Group. Rescheduled advances, which have been overdue for more than three months under the revised repayment terms, are included in "Advances overdue for more than three months".

## 3. Financial risk management (continued)

## 3.1 Credit risk (continued)

- (A) Advances and other accounts (continued)
  - (d) Concentration of advances to customers (continued)
    - Geographical analysis of gross advances to customers

      The following geographical analysis of advances to customers is based on the locations of the counterparties, after taking into account the transfer of risk. For an advance to customer guaranteed by a party situated in a location different from the customer, the risk will be transferred to the location of the guarantor.

As at 30 June 2022, there were no overdue or impaired debt securities and certificates of deposit (31 December 2021: Nil).

### 3. Financial risk management (continued)

### 3.1 Credit risk (continued)

#### (D) Credit risk management in response to COVID-19 pandemic

In the first half of 2022, the new wave of local COVID-19 pandemic has put heavy weights on Hong Kong's economy. While the pandemic is still evolving and recurring, the operating environment and financial situations of borrowers remain challenging. The Group has taken a series of risk control measures in response to the adverse impact and the uncertainty from the pandemic:

- The Group coordinated with the HKMA in launching various relief measures for individuals and commercial borrowers, in order to alleviate the financial pressure and the impact of the pandemic. The terms of the payment holidays under relief measures are granted on commercial basis, therefore the extension of relief measures to the concerned borrowers do not automatically trigger the migration to Stage 2 and Stage 3, and are not classified as rescheduled advances.
- The implementation of quarantine measures severely hit several industries, including Trading, Retail, Aviation, Tourism (including hospitality), Catering, Entertainment etc. The Group continues to conduct risk-based assessments on the borrowers within these industries. The impacts of the pandemic on the affected borrowers, their respective mitigation measures and short-term refinancing plans are also assessed to identify the vulnerable borrowers, who are put into the watchlist for on-going close monitoring. The loan classification and internal ratings of these borrowers are timely reviewed according to their latest situation.
- The Group performed stress tests of different scenarios of containment of COVID-19 pandemic regularly to assess the potential impacts on credit loss and asset quality.
- The Group reviews the forward looking macroeconomic factors used in ECL model on a quarterly basis to reflect the dynamic changes of economic outlook. While the relief measures implemented by the governments of various countries have alleviated the default pressure of the affected borrowers under COVID-19 pandemic, the Group continues its close monitoring on those borrowers with multiple extensions of relief measures being granted, and additional impairment allowances have been made to address the potential higher default risk of this portfolio upon expiration of the relief measures.

The Group continues to closely monitor the situation brought by the COVID-19 pandemic on the economy and adopt prudent asset quality management to avoid significant deterioration in asset quality.

## 3. Financial risk management (continued)

### 3.2 Market risk

#### (A) VaR

The Group uses the VaR to measure and report general market risks to the RMC and senior management on a periodic basis. The Group adopts a uniformed VaR calculation model, using a historical simulation approach and two years of historical market data, to calculate the VaR of the Group and its subsidiaries over a one-day holding period with a 99% confidence level, and sets up the VaR limit of the Group and its subsidiaries.

The following table sets out the VaR for all general market risk exposures<sup>1</sup> of the Group.

|                               | Year | At 30 June<br>HK\$'m | Minimum<br>for the first<br>half of year<br>HK\$'m | Maximum<br>for the first<br>half of year<br>HK\$'m | Average<br>for the first<br>half of year<br>HK\$'m |

#### Note:

Although there is a valuable guide to market risk, VaR should always be viewed in the context of its limitations. For example:

- the use of historical market data as a proxy for estimating future events may not encompass
   all potential events, particularly those which are extreme in nature;
- the use of a one-day holding period assumes that all positions can be liquidated or hedged in one day. This may not fully reflect the market risk arising at times of severe illiquidity, when a one-day holding period may be insufficient to liquidate or hedge all positions fully;
- the use of a 99% confidence level, by definition, does not take into account losses that might occur beyond this level of confidence; and
- VaR is calculated on the basis of exposures outstanding at the close of business and therefore does not necessarily reflect intra-day exposures.

<sup>1.</sup> Structural FX positions have been excluded.

### 3. Financial risk management (continued)

### 3.2 Market risk (continued)

#### (A) VaR (continued)

The Group recognises these limitations by formulating stress test indicators and limits to assess and manage the market risk uncovered by VaR. The stress testing programme of the market risk includes sensitivity testing on changes in risk factors with various degrees of severity, as well as scenario analysis on historical events including the 1987 Equity Market Crash, 1994 Bond Market Crash, 1997 Asian Financial Crisis, 2001 9-11 event and 2008 Financial Tsunami, etc.

### (B) Currency risk

The Group's assets and liabilities are denominated in major currencies, particularly HK Dollar, US Dollar and Renminbi. To ensure the currency risk exposure of the Group is kept to an acceptable level, risk limits (e.g. Position and VaR limit) are used to serve as a monitoring tool. Moreover, the Group seeks to minimise the gap between assets and liabilities in the same currency. Foreign exchange contracts (e.g. FX swaps) are usually used to manage FX risk associated with foreign currency-denominated assets and liabilities.

The following is a summary of the Group's major foreign currency exposures arising from trading, non-trading and structural positions and is prepared with reference to the completion instructions for the HKMA return of foreign currency position. The net options position is calculated based on the basis of delta-weighted positions of all foreign exchange options contracts.

## 3. Financial risk management (continued)

### 3.3 Liquidity risk

### (A) Liquidity coverage ratio and net stable funding ratio

|   | 2022    | 2021    |
|---|---------|---------|
| Average value of liquidity coverage ratio |         |         |
| – First quarter                           | 163.65% | 134.09% |
| – Second quarter                          | 155.02% | 134.20% |

Average value of liquidity coverage ratio is calculated based on the arithmetic mean of the liquidity coverage ratio as at the end of each working day in the quarter and the calculation methodology and instructions set out in the HKMA return of liquidity position.

|   | 2022    | 2021    |
|---|---------|---------|
| Quarter-end value of net stable funding ratio |         |         |
| – First quarter                               | 125.22% | 124.90% |
| – Second quarter                              | 128.53% | 118.50% |

Quarter-end value of net stable funding ratio is calculated based on the calculation methodology and instructions set out in the HKMA return of stable funding position.

Liquidity coverage ratio and net stable funding ratio are computed on the consolidated basis which comprise the positions of BOCHK and certain subsidiaries specified by the HKMA in accordance with the Banking (Liquidity) Rules.

### 3.3 Liquidity risk (continued)

### (B) Maturity analysis (continued)

The analysis of debt securities by remaining period to maturity is based on contractual maturity date. The disclosure does not imply that the securities will be held to maturity.

The above analysis in respect of insurance contract liabilities represents the estimated timing of net cash outflows resulting from recognised insurance contract liabilities on the balance sheet.

#### 3.4 Insurance risk

The Group is in the business of insuring against the risk of mortality, morbidity, disability, critical illness, accidents and related risks. The Group manages these risks through the application of its underwriting strategy, reinsurance arrangements and regular experience monitoring.

The underwriting strategy is intended to set premium pricing at an appropriate level that corresponds with the underlying exposure of the risks underwritten and the Group's underwriting procedures include screening processes, such as the review of health condition and family medical history to ensure alignment with the underwriting strategy.

Within the insurance process, concentrations of risk may arise where a particular event or a series of events could impact heavily on the Group's claim liabilities. Such concentrations may arise from a single insurance contract or through a small number of related contracts, and relate to circumstances where significant claim liabilities could arise.

For the in-force insurance contracts, most of the underlying insurance liabilities are related to endowment, universal life, annuity, whole life and unit-linked insurance products. For most of the insurance policies issued, the Group has a retention limit on any single life insured. The Group cedes the excess of the insured benefit over the limit to reinsurer under an excess of loss reinsurance arrangement. For some of the insurance business, the Group has entered into reinsurance arrangements that reinsure most of the insurance risk.

Uncertainty in the estimation of future benefit payments and premium receipts for long-term insurance contracts arises from the unpredictability of long-term changes in overall levels of mortality, morbidity and persistency. In this regard, the Group has conducted relevant experience studies and researches regularly to identify emerging trends. Results would be taken into account in pricing and underwriting management. The results of such studies are also considered in determining the assumptions of insurance liability which include an appropriate level of prudential margins.

## 3. Financial risk management (continued)

### 3.5 Capital management

The HKMA supervises BOCHK and certain subsidiaries specified by the HKMA on a consolidated and solo basis and, as such, receives information on the capital adequacy of, and sets capital requirements for those companies as a whole. Individual overseas banking subsidiaries and branches are directly regulated by their local banking supervisors, who set and monitor their capital adequacy requirements. Certain non-banking financial subsidiaries are also subject to the supervision and capital requirements of local regulatory authorities.

The Group has adopted the foundation internal ratings-based ("FIRB") approach to calculate the credit risk capital charge for the majority of its non-securitisation exposures. Small residual credit exposures are remained under the standardised (credit risk) ("STC") approach. The Group has adopted the standardised credit valuation adjustment ("CVA") method to calculate the capital charge for the CVA risk of the counterparty.

The Group continues to adopt the internal models ("IMM") approach to calculate the general market risk capital charge for foreign exchange and interest rate exposures and, with the approval from the HKMA, exclude its structural FX positions in the calculation of the market risk capital charge. The Group continues to adopt the standardised (market risk) ("STM") approach to calculate the market risk capital charge for the remaining exposures.

The Group continues to adopt the standardised (operational risk) ("STO") approach to calculate the operational risk capital charge.

#### (A) Basis of regulatory consolidation

The consolidation basis for regulatory purposes comprises the positions of BOCHK and certain subsidiaries specified by the HKMA in accordance with the Banking (Capital) Rules. For accounting purposes, subsidiaries are consolidated in accordance with HKFRSs.

The Company, its subsidiaries of BOC Group Life Assurance Company Limited, BOCHK Asset Management (Cayman) Limited and BOC Insurance (International) Holdings Company Limited (including their subsidiaries), and certain subsidiaries of BOCHK are included within the accounting scope of consolidation but not included within the regulatory scope of consolidation.

## 3. Financial risk management (continued)

### 3.5 Capital management (continued)

### (A) Basis of regulatory consolidation (continued)

The principal activities of the above subsidiaries are set out in "Appendix – Subsidiaries of the Company".

There were no subsidiaries which are included within the regulatory scope of consolidation but not included within the accounting scope of consolidation as at 30 June 2022 (31 December 2021: Nil).

There were also no subsidiaries which are included within both the accounting scope of consolidation and the regulatory scope of consolidation where the methods of consolidation differ as at 30 June 2022 (31 December 2021: Nil).

The Group operates subsidiaries in different countries/regions where capital is governed by local rules and there may be restrictions on the transfer of funds or regulatory capital between the members of the Group.

### (B) Capital ratio

The capital ratios are analysed as follows:

|                      | At 30 June<br>2022 | At 31 December<br>2021 |
|----------------------|--------------------|------------------------|
| CET1 capital ratio   | 17.73%             | 17.30%                 |
| Tier 1 capital ratio | 19.55%             | 19.11%                 |
| Total capital ratio  | 21.88%             | 21.44%                 |

## 3. Financial risk management (continued)

### 3.5 Capital management (continued)

#### (B) Capital ratio (continued)

The capital buffer ratios are analysed as follows:

|                                      | At 30 June<br>2022 | At 31 December<br>2021 |
|--------------------------------------|--------------------|------------------------|
| Capital conservation buffer ratio    | 2.500%             | 2.500%                 |
| Higher loss absorbency ratio         | 1.500%             | 1.500%                 |
| Countercyclical capital buffer ratio | 0.811%             | 0.799%                 |

### (C) Leverage ratio

The leverage ratio is analysed as follows:

|                         | At 30 June | At 31 December |
|-------------------------|------------|----------------|
|                         | 2022       | 2021           |
|                         | HK\$'m     | HK\$'m         |
| Tier 1 capital          | 253,082    | 247,665        |
| Leverage ratio exposure | 3,295,379  | 3,357,085      |
| Leverage ratio          | 7.68%      | 7.38%          |

### 4. Fair values of financial assets and liabilities

All financial instruments for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy as defined in HKFRS 13, "Fair value measurement". The categorisation are determined with reference to the observability and significance of the inputs used in the valuation methods and based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: based on quoted prices (unadjusted) in active markets for identical assets or liabilities. This category
  includes equity securities listed on exchange, debt instruments issued by certain governments and certain
  exchange-traded derivative contracts.
- Level 2: based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly. This category includes majority of the over-the-counter ("OTC") derivative contracts, debt securities and certificates of deposit with quote from pricing services vendors, issued structured deposits and other debt instruments. It also includes certain foreign exchange contracts with insignificant adjustments or calibrations made to observable market inputs.
- Level 3: based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. This category includes equity investments, debt instruments and fund with significant unobservable components.

For financial instruments that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

### 4. Fair values of financial assets and liabilities (continued)

#### 4.1 Financial instruments measured at fair value

The Group has an established governance structure and controls framework to ensure that fair values are either determined or validated by control units independent of the front offices. Control units have overall responsibility for independent verification of valuation results from front line businesses and all other significant fair value measurements. Other specific controls include verification of observable pricing inputs; review and approval for new models and changes to models; calibration and back-testing of models against observed market transactions; analysis and investigation of significant daily valuation movements; review of significant unobservable inputs and valuation adjustments. Significant valuation issues are reported to senior management, Risk Committee and Audit Committee.

Generally, the unit of account for a financial instrument is the individual instrument. HKFRS 13 permits a portfolio exception, through an accounting policy election, to measure the fair value of a portfolio of financial assets and financial liabilities on the basis of the net open risk position when certain criteria are met. The Group applies valuation adjustments at an individual instrument level, consistent with that unit of account. According to its risk management policies and systems to manage derivative financial instruments, the fair value adjustments of certain derivative portfolios that meet those criteria is measured on the basis of the price to be received or paid for net open risk. Those portfolio-level adjustments are allocated to the individual assets and liabilities on the basis of its relative net risk exposure to the portfolio.

The Group uses valuation techniques or broker/dealer quotations to determine the fair value of financial instruments when unable to obtain the open market quotation in active markets.

The main parameters used in valuation techniques for financial instruments held by the Group include bond prices, interest rates, foreign exchange rates, equity and stock prices, commodity prices, volatilities and correlations, counterparty credit spreads and others, which are mostly observable and obtainable from open market.

The techniques used to calculate the fair value of the following financial instruments are as below:

### Debt securities and certificates of deposit and other debt instruments

The fair value of these instruments is determined by obtaining quoted market prices from exchange, dealer or independent pricing service vendors or using discounted cash flow technique. Discounted cash flow model is a valuation technique that measures present value using estimated expected future cash flows from the instruments and then discounts these flows using a discount rate or discount margin that reflects the credit spreads required by the market for instruments with similar risk. These inputs are observable or can be corroborated by observable or unobservable market data.

#### Mortgage backed securities

For this class of instruments, external prices are obtained from independent third parties. The valuation of these securities, depending on the nature of transaction, is estimated from market standard cash flow models with input parameter which include spreads to discount rates, default and recovery rates and prepayment rates that may be observable or compiled through matrix pricing for similar issues.

### 4. Fair values of financial assets and liabilities (continued)

### 4.1 Financial instruments measured at fair value (continued)

Derivatives

OTC derivative contracts include forward, swap and option contracts on foreign exchange, interest rate, equity, commodity or credit. The fair values of these contracts are mainly measured using valuation techniques such as discounted cash flow models and option pricing models. The inputs can be observable or unobservable market data. Observable inputs include interest rate, foreign exchange rates, equity and stock prices, commodity prices, credit default swap spreads, volatilities and correlations. Unobservable inputs may be used for less commonly traded option products which are embedded in structured deposits. For certain complex derivative contracts, the fair values are determined based on broker/dealer price quotations.

Credit valuation adjustments ("CVAs") and debit valuation adjustments ("DVAs") are applied to the Group's OTC derivatives. These adjustments reflect market factors movement, expectations of counterparty creditworthiness and the Group's own credit spread respectively. They are mainly determined for each counterparty and are dependent on expected future values of exposures, default probabilities and recovery rates.

As at 30 June 2022 and 31 December 2021, financial instruments categorised as level 3 are mainly comprised of debt securities, fund and unlisted equity shares.

For certain illiquid debt securities, equity securities and fund, the Group obtains valuation quotations from counterparties which may be based on unobservable inputs with significant impact on the valuation. Therefore, these instruments have been classified by the Group as level 3. Transfers out of level 3 in 2022 were due to change of valuation input observability. The Group has established internal control procedures to control the Group's exposure to such financial instruments.

#### 4. Fair values of financial assets and liabilities (continued)

#### 4.1 Financial instruments measured at fair value (continued)

#### (B) Reconciliation of level 3 items (continued)

The fair values of unlisted FVOCI equity investments are determined with reference to (i) multiples of comparable listed companies, including average of the price/earnings ratios and average of the price/book values ratios of the comparables; or (ii) dividend discount model calculation of the underlying equity investments; or (iii) net asset value with fair value adjustments on certain assets or liabilities held (if applicable), if neither appropriate comparables nor dividend discount model calculation is available or applicable. The significant unobservable inputs and their range applied in the fair values measurement of the Group's unlisted FVOCI equity investments includes price/earnings ratios of the comparables of 19.09x – 41.02x, price/book values ratios of the comparables of 0.43x – 1.02x, liquidity discount of 30%, dividend payout ratio of 23.44% – 83.53% and return on shareholders' equity of 10.34% – 12.30%. The fair value is positively correlated to the price/earnings ratios and price/book value ratios of appropriate comparables, forecasted stream of future dividend payout or net asset values, and is negatively correlated to the liquidity discount used in the average of price/earnings ratios and price/book value ratios of comparables or discount rate used in dividend discount model.

Had all of the significant unobservable inputs applied on the valuation techniques favourably changed/unfavourably changed by 5% (31 December 2021: 5%), the Group's other comprehensive income would have increased by HK\$83 million and decreased by HK\$82 million, respectively (31 December 2021: increased by HK\$96 million and decreased by HK\$94 million, respectively).

#### 4.2 Financial instruments not measured at fair value

Fair value estimates are made at a specific point in time based on relevant market information and information about various financial instruments. The following methods and assumptions have been used to estimate the fair value of each class of financial instrument as far as practicable.

Balances with/from banks and other financial institutions and trade bills

Substantially all the financial assets and liabilities mature within one year from the balance sheet date and their carrying value approximates fair value.

Hong Kong SAR Government certificates of indebtedness and Hong Kong SAR currency notes in circulation. The carrying value of Hong Kong SAR Government certificates of indebtedness and Hong Kong SAR currency notes in circulation approximates their fair value.

Advances to customers and banks and other financial institutions

Substantially all the advances to customers and banks and other financial institutions are on floating rate terms, bear interest at prevailing market interest rates and their carrying value approximates fair value.

Investment in securities at amortised cost

The fair value of securities at amortised cost is determined by using the same approach as those debt securities and certificates of deposit and mortgage backed securities measured at fair value as described in Note 4.1.

#### Deposits from customers

Substantially all the deposits from customers mature within one year from the balance sheet date and their carrying value approximates fair value.

#### 4. Fair values of financial assets and liabilities (continued)

#### 4.2 Financial instruments not measured at fair value (continued)

Debt securities and certificates of deposit in issue

The fair value of these instruments is determined by using the same approach as those debt securities and certificates of deposit measured at fair value as described in Note 4.1.

The following tables set out the carrying values and fair values of the financial instruments not measured at fair value, except for the above with their carrying values being approximation of fair values.

|   | At 30 June 2022          |                      | At 31 December 2021      |                      |

| Hong Kong profits tax                                       |                 |                 |
| <ul> <li>Current period taxation</li> </ul>                 | 2,864           | 2,642           |
| <ul> <li>Over-provision in prior periods</li> </ul>         | (35)            | (233)           |
|   | 2,829           | 2,409           |
| Taxation outside Hong Kong                                  |                 |                 |
| <ul> <li>Current period taxation</li> </ul>                 | 294             | 267             |
| <ul> <li>(Over)/under-provision in prior periods</li> </ul> | (11)            | 20              |
|   | 3,112           | 2,696           |
| Deferred tax  |                 |                 |
| Origination and reversal of temporary differences and       |                 |                 |
| unused tax credits  | (140)           | (134)           |
|   | 2,972           | 2,562           |

Hong Kong profits tax has been provided at the rate of 16.5% (2021: 16.5%) on the estimated assessable profits arising in Hong Kong for the first half of 2022. Taxation on profits outside Hong Kong has been calculated on the estimated assessable profits for the first half of 2022 at the rates of taxation prevailing in the countries/regions in which the Group operates.

#### 16. Taxation (continued)

The taxation on the Group's profit before taxation that differs from the theoretical amount that would arise using the taxation rate of Hong Kong is as follows:

|   | Half-year ended<br>30 June 2022<br>HK\$'m | Half-year ended<br>30 June 2021<br>HK\$'m |
|---|---|---|
| Profit before taxation  | 17,389                                    | 16,153                                    |
| Calculated at a taxation rate of 16.5% (2021: 16.5%)          | 2,869                                     | 2,665                                     |
| Effect of different taxation rates in other countries/regions | 66  | 99  |
| Income not subject to taxation                                | (45)                                      | (135)                                     |

| Taxation charge   | 2,972                                     | 2,562                                     |
| Effective tax rate  | 17.1%                                     | 15.9%                                     |

#### 17. Dividends

|                  | Half-year ended<br>30 June 2022 |        | Half-year ende<br>30 June 2021 |        |
|------------------|---------------------------------|--------|--------------------------------|--------|
|                  | Per share                       | Total  | Per share                      | Total  |
|                  | HK\$                            | HK\$'m | HK\$                           | HK\$'m |
| Interim dividend | 0.447                           | 4,726  | 0.447                          | 4,726  |

At a meeting held on 30 August 2022, the Board declared an interim dividend of HK\$0.447 per ordinary share for the first half of 2022 amounting to approximately HK\$4,726 million. This declared interim dividend is not reflected as a dividend payable in this interim financial information, but will be reflected as an appropriation of retained earnings for the year ending 31 December 2022.

#### 18. Earnings per share

The calculation of basic earnings per share for the first half of 2022 is based on the consolidated profit for the period attributable to equity holders of the Company of approximately HK\$13,472 million (first half of 2021: HK\$12,576 million) and on the ordinary shares in issue of 10,572,780,266 shares (2021: 10,572,780,266 ordinary shares).

There was no dilution of earnings per share as no potential ordinary shares were in issue for the first half of 2022 (first half of 2021: Nil).

#### 21. Derivative financial instruments

The Group enters into exchange rate, interest rate, commodity, equity and credit related derivative financial instrument contracts for trading and risk management purposes.

Currency forwards represent commitments to purchase and sell foreign currency on a future date. Interest rate futures are contractual obligations to receive or pay a net amount based on changes in interest rates or buy or sell interest rate financial instruments on a future date at an agreed price in the financial market under the administration of the stock exchange. Forward rate agreements are individually negotiated interest rate futures that call for a cash settlement at a future date for the difference between a contract rate of interest and the current market rate, based on a notional principal amount.

Currency, interest rate and commodity swaps are commitments to exchange one set of cash flows or commodity for another. Swaps result in an exchange of currencies, interest rates (for example, fixed rate for floating rate), or precious metals (for example, silver swaps) or a combination of all these (for example, cross-currency interest rate swaps). Except for certain currency swap contracts, no exchange of principal takes place.

Foreign currency, interest rate, precious metal and equity options are contractual agreements under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of the financial instrument at a predetermined price. In consideration for the assumption of foreign exchange and interest rate risk, the seller receives a premium from the purchaser. Options are negotiated over-the-counter between the Group and its counterparty or traded through the stock exchange (for example, exchange-traded stock option).

The contract/notional amounts and fair values of derivative financial instruments held by the Group are set out in the following tables. The contract/notional amounts of these instruments indicate the volume of transactions outstanding at the balance sheet dates and certain of them provide a basis for comparison with the fair values of instruments recognised on the balance sheet. However, they do not necessarily indicate the amounts of future cash flows involved or the current fair values of the instruments and, therefore, do not indicate the Group's exposure to credit or market risks. The derivative financial instruments become favourable (assets) or unfavourable (liabilities) as a result of fluctuations in foreign exchange rates, market interest rates, commodity prices or equity prices relative to their terms. The aggregate fair values of derivative financial instruments can fluctuate significantly from time to time.

### 21. Derivative financial instruments (continued)

The following tables summarise the contract/notional amounts and fair values of each class of derivative financial instrument as at 30 June 2022 and 31 December 2021:

|                            | At 30 June 2022          |                  |                       |  |

|   | 138,008                      | 83,041                           |

In February 2022, BOCHK issued HK\$2 billion senior notes, interest rate at 1.33% per annum payable semi-annually, due in 2024.

#### 31. Deferred taxation

Deferred tax is recognised in respect of the temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in this interim financial information and unused tax credits in accordance with HKAS 12 "Income Taxes".

The major components of deferred tax (assets)/liabilities recorded in the balance sheet, and the movements during the first half of 2022 and the year ended 31 December 2021 are as follows:

|                                 | Half-year ended 30 June 2022                 |                                   |                  |                                    |                  |                 |

#### 31. Deferred taxation (continued)

Deferred tax assets and liabilities are offset on an individual entity basis when there is a legal right to set off current tax assets against current tax liabilities and when the deferred taxation relates to the same authority. The following amounts, determined after appropriate offsetting, are shown in the balance sheet:

|                          | At 30 June | At 31 December |
|--------------------------|------------|----------------|
|                          | 2022       | 2021           |
|                          | HK\$'m     | HK\$'m         |
| Deferred tax assets      | (417)      | (192)          |
| Deferred tax liabilities | 4,457      | 5,799          |
|                          | 4,040      | 5,607          |

|   | At 30 June<br>2022<br>HK\$'m | At 31 December<br>2021<br>HK\$'m |
|---|------------------------------|----------------------------------|
| Deferred tax assets to be recovered after more than twelve months  Deferred tax liabilities to be settled after more than | (149)                        | (153)                            |
| twelve months   | 6,307                        | 6,435                            |
|   | 6,158                        | 6,282                            |

As at 30 June 2022 and 31 December 2021, the Group has no unrecognised deferred tax assets in respect of tax losses. All of the amount for the Group has no expiry date under the current tax legislation in different countries/ regions.

#### 32. Insurance contract liabilities

|   | Half-year ended | Year ended  |
|---|-----------------|-------------|
|   | 30 June         | 31 December |
|   | 2022            | 2021        |
|   | HK\$'m          | HK\$'m      |
| At 1 January                                | 153,911         | 139,504     |
| Benefits paid                               | (11,254)        | (14,784)    |
| Claims incurred and movement in liabilities | 12,751          | 29,191      |
| At period/year end                          | 155,408         | 153,911     |

The insurance contract liabilities that are covered by reinsurance arrangements amounted to HK\$46,122 million (31 December 2021: HK\$48,037 million) and the associated reinsurance assets of HK\$56,795 million (31 December 2021: HK\$59,696 million) are included in "Other assets" (Note 26).

### 33. Share capital

#### 36. Contingent liabilities and commitments

The following is a summary of the contractual amounts of each significant class of contingent liability and commitment and the aggregate credit risk-weighted amount and is prepared with reference to the completion instructions for the HKMA return of capital adequacy ratio.

|   | At 30 June<br>2022<br>HK\$'m | At 31 December<br>2021<br>HK\$'m |
|---|------------------------------|----------------------------------|
| Direct credit substitutes   | 1,199                        | 1,338                            |
| Transaction-related contingencies   | 28,621                       | 30,075                           |
| Trade-related contingencies   | 20,761                       | 25,815                           |
| Commitments that are unconditionally cancellable without prior notice             | 516,152                      | 526,430                          |
| Other commitments with an original maturity of  – up to one year  – over one year | 22,117<br>154,314            | 15,665<br>173,623                |
|   | 743,164                      | 772,946                          |
| Credit risk-weighted amount   | 76,687                       | 83,704                           |

The credit risk-weighted amount is calculated in accordance with the Banking (Capital) Rules. The amount is dependent upon the status of the counterparty and the maturity characteristics of each type of contract.

#### 37. Capital commitments

The Group has the following outstanding capital commitments not provided for in this interim financial information:

|  | At 30 June | At 31 December |
|--|------------|----------------|
|  | 2022       | 2021           |
|  | HK\$'m     | HK\$'m         |
| Authorised and contracted for but not provided for | 259        | 183            |
| Authorised but not contracted for                  | 223        | 119            |
|  | 482        | 302            |

The above capital commitments mainly relate to commitments to purchase computer equipment and software, and to renovate the Group's premises.

#### 38. Operating lease commitments

#### As lessor

The Group has contracted with tenants for the following future minimum lease receivables under non-cancellable operating leases:

|                           | At 30 June<br>2022<br>HK\$'m | At 31 December<br>2021<br>HK\$'m |
|---------------------------|------------------------------|----------------------------------|
| Properties and equipment  |                              |                                  |
| – Not later than one year | 408                          | 469                              |
| – One to two years        | 241                          | 241                              |
| – Two to three years      | 85                           | 103                              |
| – Three to four years     | 10                           | 16                               |
| – Four to five years      | 2                            | 5                                |
|                           | 746                          | 834                              |

The Group leases its investment properties under operating lease arrangements, with leases typically for a period from one to three years. The terms of the leases generally require the tenants to pay security deposits and provide for rent adjustments according to the prevailing market conditions upon the lease renewal.

#### 39. Segmental reporting

The Group manages the business mainly from a business segment perspective and over 90% of the Group's revenues, profits before tax and assets are derived from Hong Kong. Currently, four operating segments are identified: Personal Banking, Corporate Banking, Treasury and Insurance. The classification of the Group's operating segments is based on customer segment and product type, which is aligned with the RPC (relationship, product and channel) management model of the Group.

Both Personal Banking and Corporate Banking provide general banking services including various deposit products, overdrafts, loans, credit cards, trade related products and other credit facilities, investment and insurance products, and foreign currency and derivative products. Personal Banking mainly serves retail customers and small enterprises, while Corporate Banking mainly deals with corporate customers. Treasury manages the funding and liquidity, and the interest rate and foreign exchange positions of the Group in addition to proprietary trades. The Insurance segment represents business mainly relating to life insurance products, including individual life insurance and group life insurance products. "Others" mainly represents the Group's holdings of premises, investment properties, equity investments, certain interests in associates and joint ventures and the businesses of the Southeast Asian entities.

Measurement of segment assets, liabilities, income, expenses, results and capital expenditure is based on the Group's accounting policies. The segment information includes items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Inter-segment funding is charged according to the internal funds transfer pricing mechanism of the Group, which is primarily based on market rates with the consideration of specific features of the product.

As the Group derives a majority of revenue from interest and the senior management relies primarily on net interest income in managing the business, interest income and expense for all reportable segments are presented on a net basis. Under the same consideration, insurance premium income and insurance benefits and claims are also presented on a net basis.

#### 40. Assets pledged as security

As at 30 June 2022, the liabilities of the Group amounting to HK\$19,146 million (31 December 2021: HK\$12,788 million) were secured by assets deposited with central depositories to facilitate settlement operations. In addition, the liabilities of the Group amounting to HK\$63,276 million (31 December 2021: HK\$88,268 million) were secured by debt securities related to sale and repurchase arrangements. The amount of assets pledged by the Group to secure these liabilities was HK\$86,272 million (31 December 2021: HK\$103,349 million) mainly included in "Financial assets at fair value through profit or loss" and "Investment in securities".

In addition, the Group also pledges securities for derivative transactions. These assets continue to be recorded on the balance sheet. As there is no direct relationship between the securities pledged and the associated liabilities, the amounts are not disclosed.

#### 41. Significant related party transactions

The Group is subject to the control of the State Council of the PRC Government through China Investment Corporation ("CIC"), its wholly-owned subsidiary Central Huijin Investment Ltd. ("Central Huijin"), and BOC in which Central Huijin has controlling equity interests.

# (a) Transactions with the parent companies and the other companies controlled by the parent companies

General information of the parent companies:

The Group is controlled by BOC. Central Huijin is the controlling entity of BOC, and it is a wholly-owned subsidiary of CIC which is a wholly state-owned company engaging in foreign currency investment management.

Central Huijin has controlling equity interests in certain other entities in the PRC.

The Group enters into banking and other transactions with these entities in the normal course of business which include loans, investment securities, money market and reinsurance transactions.

The majority of transactions with BOC arise from money market activities. As at 30 June 2022, the Group's related aggregate amounts due from and to BOC were HK\$148,729 million (31 December 2021: HK\$191,806 million) and HK\$133,021 million (31 December 2021: HK\$245,648 million) respectively. The aggregate amounts of income and expenses of the Group arising from these transactions with BOC for the first half of 2022 were HK\$505 million (first half of 2021: HK\$760 million) and HK\$770 million (first half of 2021: HK\$118 million) respectively.

As at 30 June 2022, the related aggregate amounts due from and to subsidiaries of BOC were HK\$1,513 million (31 December 2021: HK\$1,113 million) and HK\$12,109 million (31 December 2021: HK\$10,139 million) respectively.

Other transactions with companies controlled by BOC are not considered material.

# (b) Transactions with government authorities, agencies, affiliates and other state controlled entities

The Group is subject to the control of the State Council of the PRC Government through CIC and Central Huijin, which also directly or indirectly controls a significant number of entities through its government authorities, agencies, affiliates and other state controlled entities. The Group enters into banking transactions with government authorities, agencies, affiliates and other state controlled entities in the normal course of business at commercial terms.

#### 41. Significant related party transactions (continued)

#### Transactions with government authorities, agencies, affiliates and other state controlled entities (continued)

These transactions include, but are not limited to, the following:

- lending, provision of credits and guarantees, and deposit taking;
- inter-bank balance taking and placing;
- sales, purchases, underwriting and redemption of bonds issued by other state controlled entities;
- rendering of foreign exchange, remittance and investment related services;
- provision of fiduciary activities; and
- purchase of utilities, transport, telecommunication and postage services.

#### (c) Summary of transactions entered into during the ordinary course of business with associates, joint ventures and other related parties

The aggregate income/expenses and balances arising from related party transactions with associates, joint ventures and other related parties of the Group are summarised as follows:

|   | Half-year ended | Half-year ended |
|---|-----------------|-----------------|
|   | 30 June 2022    | 30 June 2021    |

#### 41. Significant related party transactions (continued)

#### Key management personnel

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Group, directly or indirectly, including directors and senior management. The Group accepts deposits from and grants loans and credit facilities to key management personnel in the ordinary course of business. During both the current and prior periods, no material transaction was conducted with key management personnel of the Company and its holding companies, as well as parties related to them.

The compensation of key management personnel is detailed as follows:

|   | Half-year ended | Half-year ended |
|---|-----------------|-----------------|
|   | 30 June 2022    | 30 June 2021    |
|   | HK\$'m          | HK\$'m          |
| Salaries and other short-term employee benefits | 17              | 18              |

#### 42. IBOR reform

The Group is exposed to different interbank offered rates, predominantly US Dollar LIBOR. The following table contains details of financial instruments that the Group holds as at 30 June 2022 and 31 December 2021 which reference LIBOR and have not yet transitioned to an alternative interest rate benchmark:

|                                      | At 30 June 2        | 022   |  |
|--------------------------------------|---------------------|---|--|
|                                      |                     | Financial instruments yet to transition to alternative benchmarks |  |
|                                      | USD LIBOR<br>HK\$'m | Others*<br>HK\$'m   |  |
| Non-derivative financial assets      | 206,626             | _   |  |
| Non-derivative financial liabilities | 628                 | -   |  |
| Derivative contract/notional amounts | 486,941             | -   |  |

|   | At 31 December 2021  Financial instruments yet to transition to alternative benchmarks |             |  |
|---|--|-------------|--|
|   |  |             |  |
|   | USD LIBOR<br>HK\$'m  |             |  |
| Non-derivative financial assets<br>Non-derivative financial liabilities | 183,073<br>626   | 23,227<br>– |  |
| Derivative contract/notional amounts                                    | 501,140  | _           |  |

Comprises financial instruments referencing other significant benchmark rates yet to transition to alternative benchmarks (GBP LIBOR and JPY LIBOR).

#### 43. International claims

The below analysis is prepared with reference to the completion instructions for the HKMA return of international banking statistics. International claims are exposures to counterparties on which the ultimate risk lies based on the locations of the counterparties after taking into account the transfer of risk, and represent the sum of crossborder claims in all currencies and local claims in foreign currencies. For a claim guaranteed by a party situated in a location different from the counterparty, the risk will be transferred to the location of the guarantor. For a claim on an overseas branch of a bank whose head office is located in another location, the risk will be transferred to the location where its head office is located.

Claims on individual countries/regions, after risk transfer, amounting to 10% or more of the aggregate international claims of the Group in either period/year end are shown as follows:

|                               | At 30 June 2022  |                              |   |   |                    |
|-------------------------------|------------------|------------------------------|---|---|--------------------|

#### 45. Compliance with HKAS 34

The unaudited interim financial information for the first half of 2022 complies with HKAS 34 "Interim Financial Reporting" issued by the HKICPA.

#### 46. Statutory accounts

The financial information relating to the year ended 31 December 2021 that is included in this Interim Report as comparative information does not constitute the Company's statutory annual consolidated financial statements for that year but is derived from those financial statements. Further information relating to these statutory financial statements required to be disclosed in accordance with section 436 of the Hong Kong Companies Ordinance is as follows:

The Company has delivered the financial statements for the year ended 31 December 2021 to the Registrar of Companies as required by section 662(3) of, and Part 3 of Schedule 6 to, the Hong Kong Companies Ordinance.

The Company's auditor has reported on those financial statements. The auditor's report was unqualified; did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying its report; and did not contain a statement under sections 406(2), 407(2) or (3) of the Hong Kong Companies Ordinance.
