"The Group's business continued to prosper in the first half of 2006 with a strong emphasis on qualitative growth and higher-yielding business segments. We have succeeded in delivering the highest operating profit and net profit since the Group's IPO in 2002. We have moved closer toward the objective of evolving into a full-fledged top-quality financial services group with a powerful base in Hong Kong, a solid presence in China and a strategic foothold in the region. The acquisition of BOC Life represents a concrete step in our pursuit of new capabilities and businesses. A crucial part of our Strategy has been to deepen our corporate culture and reinforce our human resources management. I am pleased to note that we made steady progress in that connection in the period under review.

Looking ahead, we expect the Hong Kong economy to remain in a state of steady growth, despite a high degree of uncertainty due to the volatility in oil prices, less favourable trade prospects and the Mainland's macroeconomic adjustment measures. We will move forward with the implementation of the Group's Strategic Plan 2006-11 to create higher value for shareholders and customers."
