### **Risk Disclosure of Securities Trading:**

#### **Risk of Securities Trading**

Monthly Stocks Savings Plan is not equivalent to, nor should it be treated as a substitute for, time deposit. The prices of securities fluctuate, sometimes dramatically. The price of a security may move up or down, and may become valueless. It is as likely that losses will be incurred rather than profit made as a result of buying and selling securities.

#### **Risk of Securities Margin Trading**

The risk of loss in financing a transaction by deposit of collateral is significant. You may sustain losses in excess of your cash and any other assets deposited as collateral with the licensed or registered person. Market conditions may make it impossible to execute contingent orders, such as "stop-loss" or "stop-limit" orders. You may be called upon at short notice to make additional margin or interest payments. If the required margin or interest payments are not made within the prescribed time, your collateral may be liquidated without your consent. Moreover, you will remain liable for any resulting deficit in your account and interest charged on your account. You should therefore carefully consider whether such a financing arrangement is suitable in light of your own risk tolerance, financial situation, investment experience, investment objectives, investment horizon and investment knowledge.

You are reminded to understand the relevant details, risks, charges and important notes before investing in Shanghai A shares or Shenzhen A shares. For details, please read the "Important Notice of Trading China A Shares and A Shares Margin Trading via Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect" in BOCHK's website or the branch staff of BOCHK.

#### **RMB Conversion Limitation Risk**

RMB investments are subject to exchange rate fluctuations which may provide both opportunities and risks. The fluctuation in the exchange rate of RMB may result in losses in the event that the customer converts RMB into HKD or other foreign currencies. Currency exchange is also subject to cost (being the spread between the buy and sell of RMB). RMB is currently not fully freely convertible. Individual customers can be offered CNH rate to conduct conversion of RMB through bank accounts and may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance.

#### **Important Notice of US Securities:**

You should fully understand the details, risks, charges and important notice before invest in US securities. You should seek advice from your professional advisors as to your particular tax position, including but not limited to estate duty and withholding tax that might arise from investing in overseas products.

US securities investment services are not applicable to US persons and might only be applicable to limited jurisdiction. Any person considering an investment should seek independent advice on the suitability or otherwise of the particular investment.
