Risk Disclosure of Foreign Currency Trading:

Foreign currency investments are subject to exchange rate fluctuations which may provide both opportunities and risks. The fluctuation in the exchange rate of foreign currency may result in losses in the event that the customer converts the foreign currency into Hong Kong dollar or other foreign currencies.

Risk Disclosure of RMB Investment and RMB Insurance Services:

RMB investments are subject to exchange rate fluctuations which may provide both opportunities and risks. The fluctuation in the exchange rate of RMB may result in losses in the event that the customer converts RMB into HKD or other foreign currencies.

RMB policy is subject to exchange rate risk. The exchange rate between RMB and HKD may rise as well as fall. Therefore, if calculated in HKD, premiums, fees and charges (where applicable), account value / surrender value and other benefits payable under RMB policy will vary with the exchange rate. The exchange rate between RMB and HKD will be the market-based prevailing exchange rate determined by the insurer from time to time, which may not be the same as the spot rate of banks. The fluctuation in exchange rate may result in losses if a customer chooses to pay premiums in HKD, or requests the insurer to pay the account value / surrender value or other benefits payable in HKD, for RMB policy.

RMB is currently not fully freely convertible. Individual customers can be offered CNH rate to conduct conversion of RMB through bank accounts and may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance.

Risk Disclosure of Securities Trading:

The prices of securities may fluctuate, sometimes dramatically. The price of a security may move up or down, and may become valueless. It is as likely that losses will be incurred rather than profits made as a result of buying and selling securities.

Risk Disclosure of Securities Margin Trading:

The risk of loss in financing a transaction by deposit of collateral is significant. You may sustain losses in excess of your cash and any other assets deposited as collateral with the licensed or registered person. Market conditions may make it impossible to execute contingent orders, such as "stop-loss" or "stop-limit" orders. You may be called upon at short notice to make additional margin or interest payments. If the required margin or interest payments are not made within the prescribed time, your collateral may be liquidated without your consent. Moreover, you will remain liable for any resulting deficit in your account and interest charged on your account. You should therefore carefully consider whether such a financing arrangement is suitable in light of your own financial position and investment objectives.

Risk Disclosure of Funds Investment:

Certain mutual funds and unit trusts ("Investment Funds") are structured products involving derivatives. The investment decision is yours but you should not invest in any Investment Fund unless the intermediary who sells such Investment Fund to you has explained to you that such Investment Fund is suitable for you having regard to your financial situation, investment experience and investment objectives.

Investment in Investment Funds involves significant risks. It is impossible to describe every risk associated with such an Investment Fund that is relevant to you. Before making your investment decision, you should carefully read the offering documents of the relevant Investment Fund including, in particular, the sections about risks, and ensure that you fully understand the nature and all the risks associated with an investment in the relevant Investment Fund and are willing to assume such risks. You should carefully consider whether the relevant Investment Fund is suitable for you in light of your own relevant circumstances. If in doubt, you should seek independent professional advice.

Risk Disclosure of Notional Precious Metals Passbook Account:

The market in precious metals is volatile and a loss may be incurred from transacting in precious metals. Precious metals do not bear interest. Your purchase of precious metals for the account does not represent a purchase of physical metals or a deposit of money. You will not have any interest in any precious metals owned or held by us or be entitled to physical delivery of precious metals. Although investment may bring about profit opportunities, each kind of investment tool comes with its own risks. Due to the fluctuating nature of the precious metals markets, the prices of precious metals may rise or fall beyond your expectations and your investment funds may increase or decrease in value as a result of selling and purchasing of precious metals. Before making any investment decision, you should assess your own willingness and ability to bear risks and are advised to seek advice from an independent financial advisor.

Risk Disclosure in respect of Precious Metal / FX Margin Trading:

The risk of loss in leveraged foreign exchange trading and precious metals trading can be substantial. You may sustain losses in excess of your initial cash margin. Placing contingent orders, such as "stop-loss" or "stop-limit" orders, will not necessarily limit losses to the intended amounts. Market conditions may make it impossible to execute such orders. You may be called upon at short notice to deposit additional cash margin. If the required cash margin or interest payments are not provided within the prescribed time, your position may be liquidated. You will remain liable for any resulting deficit in your account and interest charged on your account. A demand for additional cash margin is not a precondition to, and does not in any way limit, our right to liquidate your open positions according to the relevant terms and conditions. You should therefore carefully consider whether such trading is suitable in light of your own financial position and investment objectives.

Risk Disclosure of Structured Investment and Investment Deposit:

These are structured investment products involving derivatives. The investment decision is yours but you should not invest in these products unless the intermediary who sells them to you has explained to you that these products are suitable for you having regard to your financial situation, investment experience and investment objectives. These products are not equivalent to time deposit. Structured Deposit is not a protected deposit and is not protected by the Deposit Protection Scheme in Hong Kong.

Risk Disclosure of Debt Securities Trading:

The prices of debt securities fluctuate, sometimes dramatically. The price of a debt security may move up or down, and may become valueless. It is as likely that losses will be incurred rather than profit made as a result of buying and selling debt securities.

Risk Disclosure / Important Notes:

This Service Guide does not constitute any offer, solicitation, recommendation, comment or any guarantee to the purchase or sale of any investment product or service. Although investment may bring profit opportunities, each investment product or service involves potential risks. Due to dynamic changes in the market, the price movement and volatility of investment products may not be the same as expected by customers. Customers' fund may increase or reduce due to the purchase or sale of investment products. The loss incurred from investment maybe the same or greater than initial investment amount, proceeds may also change accordingly. Part of the investment may not be able to liquidate immediately under certain market situation. Before making any investment decisions, customers should consider their own financial situation, investment objectives and experiences, willingness and ability to bear risks, and understand the nature and risks of the relevant product. For the nature and risk disclosures of individual investment products, customers should read carefully the relevant product offering documents for details. Customers should seek professional advice from an independent financial adviser.
